

# An affordable way to help protect your smile

## Helping you stay healthy

Taking care of your teeth can be expensive. That's why the right dental plan is so important — it not only pays for preventive care that can keep you and your family healthy, but it also helps pay for more extensive, costly and often unexpected expenses — such as fillings, crowns and root canals. And, with the Managed Dental Care (DHMO) Plan\* copays are the same for both specialists and general dentists, so you'll have no surprises. That way you can plan and budget for your dental care needs.

### A wide range of coverage

The Managed Dental Care Plan covers hundreds of dental procedures, saving you money on important treatments such as:

- Sealants, adult fluoride and cosmetic bleaching
- Oral cancer screenings
- Bridges and dentures
- Implants<sup>1</sup> and crowns

What's more, you can receive a third cleaning during the year if you or your covered dependent is pregnant, or if you have specific medical needs.<sup>1</sup>

### You can even save on orthodontia

The Managed Dental Care Plan makes braces more affordable. You can also continue your coverage if you switch from another Managed Care/DHMO carrier.<sup>1</sup>

### It's easy to use your plan

To get started, select your Primary Care Dentist (spouse and dependent children may choose their own Primary Care Dentist), who will manage all of your dental services.

To find an in-network Primary Care Dentist visit [guardianlife.com](http://guardianlife.com) or download our 'Find a Provider' mobile app. Select Managed Dental Care as your plan type.

### A dental plan that makes you smile

- No ID cards needed and ability to change dentists once per month
- No waiting periods for major services
- No annual maximums or deductibles

### The Managed Dental Care Plan is smart choice for:

- Anyone wanting to save on dental care
- Those seeking access to quality dental care
- Preventive services that can support your overall health
